Work Experience

Gleim Publications
Gainesville, FL

DEVELOPER ASSISTANT
January 2021 - Present

- Assisted development teams in clearing up issue ticket backlog.
- Provided user requirements analysis, design, and development support for enhancement of a web application accessed by millions of users worldwide.
- Acquired working knowledge of Git feature branching, continuous deployment, and LAMP stack technologies working alongside other developers in an Agile development team.

Gleim Publications
Gainesville, FL

MANUAL QA TESTER
October 2020 - Present

- Tested within the Agile development methodology to ensure that bugs found during the life cycle of the product's development were found and addressed quickly.
- Conducted both white and black box manual QA testing techniques depending on test requirements. Testing done includes regression testing, smoke testing, sanity testing, holistic testing, and stress testing, among others.
- Documented test results by creating test reports communicating results of testing to developers, project managers, and QA/QC administration.

City College
Gainesville, FL

LIBRARY TECHNICIAN
August 2019 - October 2020

- Worked self-sufficiently. Helped patrons and students with general questions and any technological issues that arose in the library.
- Due to the isolated nature of the job it was largely self-taught and required a strong sense of independent drive and initiative.

Education

University of Florida
Gainesville, FL

B.A. POLITICAL SCIENCE
December 2019

- Received a minor in History and a certification in International Relations.
- Relevant administrative coursework included Public Administration, Ethical Philosophy, and Communications.
- Associate's focused in Programming and Analysis included relevant technical coursework in Web Authoring, Object-oriented Programming, Software Testing, and Database Management.

Skills

Languages: Python, JavaScript, C++, SQL, PHP, Selenium Java
Technologies: HTML5, CSS3, SASS, MySQL, Git Version Control, Selenium, Jira

Personal Projects

Budgeter: A Budget App

VANILLA JAVASCRIPT

- Developed a budgeting app using the module pattern in vanilla JavaScript.
- Employed bubbling event delegation and event listeners to catch keypresses and clicks on the app.
- Implemented a local storage solution with the browser cache so that users' incomes and expenses are retrievable when they come back to the page.

Discord.py Chat Bot

PYTHON

- Developed a Discord bot using the Discord API and Discord.py module in Python.
- Bot has a plethora of moderation, gambling, and social commands in a modular format that allows for expansion in the future.
- Constructed a web page on my personal portfolio that allows visitors to add the bot to their Discord servers while displaying the bot's supported commands.
- Hosted the website and the bot so that they remain online indefinitely.

Personal Portfolio Website

HTML, SASS, VANILLA JAVASCRIPT

- Created a beautiful website from scratch using HTML, SASS, and JavaScript that is both responsive and elegant in design.
- Structured with CSS Flexbox and CSS Grid to provide a modern, easy-to-use user interface.
- Utilized SASS for creating variables, nesting CSS, and using mixins for reusable styling throughout the stylesheet.
