SUMMARY

Dynamic SDET and quality assurance engineer equally at ease working as an individual contributor or team leader. Key player in maintaining quality of SaaS products within feature teams and developing custom frameworks for increased automation efficiency. Experienced in executing business requirements and leadership-designated roadmaps in both startup and enterprise companies at a high level.

EXPERIENCE

Software Development Engineer in Test

Incident IQ — 2021 - Present — Atlanta, GA

Performed manual and automated testing techniques in Agile startup environment feature and dev support teams to ensure quality of a startup SaaS product used by over 20 million users (1800+ school districts nationwide)

- Led initiative to increase legacy feature test coverage with C# ASP.NET Core unit and integration tests that decreased customer-reported bugs by 40% over the course of 6 months
- Leveraged Cypress.js to build and maintain a page-object model framework that greatly improved efficiency and reusability of end-to-end automation test code written by engineers
- Implemented CD pipelines in Azure DevOps used for testing mirror environments to ensure release stability
- Validated API functionality of features using Postman to ensure proper request and response data, error handling, and seamless integration with other system components
- Conducted database testing using SQL Server and MongoDB to validate data integrity, query performance, and accurate data retrieval / manipulation across relational and NoSQL databases
- Designed test plans and test cases to maximize test coverage of features being release on development teams
- Took on leadership role and spearheaded QA team testing efforts on multiple new product lines and features including revamped permissions systems, product wide global search, an HRSD platform, forms systems, and support ticketing features
- Wrote clear and concise technical documentation for engineering teams and end-users to ensure seamless adoption and understanding of new features
- Performed technical leadership duties by leading scrum ceremonies, reviewing test code of engineers, and providing mentorship and guidance to junior automation engineers

QA Engineer

Gleim Publications — 2020 - 2021 — Gainesville, FL

Performed manual and automated testing techniques in enterprise environment to validate legacy test-taking software used by 90% of all accounting students nationwide

- Managed bug triage process using Jira and GitLab to document product defects, working closely with developers to prioritize and resolve bugs
- Developed in-house automation testing tools to provide increased coverage and reusable test code for multiple legacy features
- POC'd and implemented PHPUnit tests to minimize repetitive exploratory testing and database validation required of other manual testers
- Created and maintained clear, actionable test reports and documentation in Confluence, translating technical findings for both developers and stakeholders to inform decision-making and feature enhancements

EDUCATION

Bachelor's Degree in Political Science

University of Florida — 2017 - 2019 — Gainesville, FL

Associate's Degree in Computer Science

Santa Fe College — 2015 - 2017 — Gainesville, FL

STRENGTHS

Quality Optimization

Driving quality improvements and processes through enhancing testing frameworks, fixing flake, ensuring test reliability, and implementing industry standard best practices

Debugging & Troubleshooting

Diagnosing and resolving complex software issues using SQL for database analysis, Postman for API validation, and browser dev tools for front-end debugging, ensuring efficient issue resolution and minimal downtime

Learning & Adaptability

Quickly learning and mastering new tools and technologies to enhance development efficiency and keep up with industry standards

Communication & Collaboration

Working closely with developers, product, and support teams to triage issues, clarify requirements, write technical documentation, and provide detailed bug reports with Jira, Confluence, and Azure DevOps

SKILLS

JavaScript, Python, C#, SQL Server, MongoDB, Cypress.JS, ASP.NET Core, Azure, Unity Engine, Postman, JIRA / ADO / GitLab, Scrum, GitHub, Git Version Control, Manual Software Testing, End to End Automation Testing, Unit & Integration Testing, Agile Development

KEY ACHIEVEMENTS

Successfully Covered Many New Products with Automated Test Suites

Led testing efforts for HRSD and permissions rearchitecturing projects resulting in successful launch and positive customer feedback by creating API, end-to-end, database, unit, and integration test suites for new products and features

Recipient of 2024 Winner's Circle Award

Recipient of internal company award given to only 10 employees company-wide that acknowledges individuals who consistently go above and beyond in their contribution, showcasing a relentless commitment to excellence and pursuit of success.
